STYLING HINTS AND TIPS
Using a medium round brush,
blow-dry smooth to create volume
throughout (this does not apply
to the fringe area.) Barrel curl the
hair at the mid-lengths and ends to
create soft movement. Brush into
shape with a vented brush.

ILLUMINA CINEMATIC

COLOR

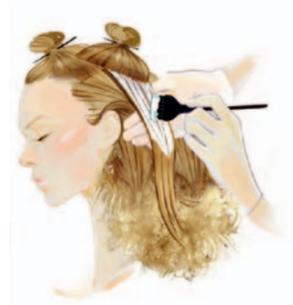

STEP 1
Create an offset star section on the top of the head.

STEP 4
The remaining hair inside the star is to be worked diagonally and back to back, with root stretch, color formula A and laid-on foil to isolate.

STEP 7
Work through the remaining star section on the top with back-to-back slices using color formula D at the root area and color formula E through the mid-lengths and ends, then alternate with color formula B in the same way until complete.

STEP 2
Take a triangle section from high recessions on the left and right-hand sides. Apply color formula A from root to tip.

STEP 5
A mid-band application is to be applied at a slight diagonal from the root area with root stretch. Develop until a yellow to pale yellow undertone is achieved. Rinse, shampoo lightly and blow-dry.

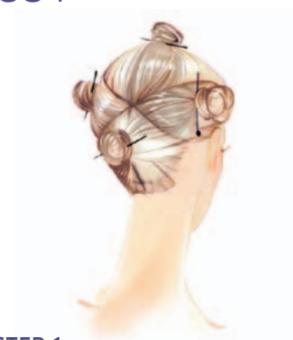

STEP 3
Apply color formula A around the perimeter of the star with root stretch. Continue to work around the head, using the color brush to back brush the hair as you apply.

STEP 6
Repeat offset star section on the top. Apply color formula B to the root areas with root stretch around the entire head and up to the perimeter of the star shape. Apply color formula C through remaining mid-lengths and ends, and isolate with foil.

CUT

STEP 1
Divide the hair into 4 sections.

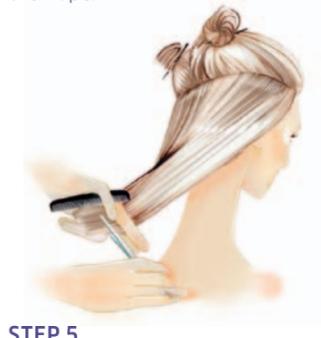

STEP 2
Starting at the nape area, cut the length to approximately 1 inch below the shoulder line at a slight elevation to create a soft edge.

STEP 3
Next, take a 1-inch-wide vertical section at the center of the nape, using the shoulder line as a guideline, and cut at a 45-degree angle to create graduation.

STEP 4
Continue taking 1-inch-wide sections and working towards the back of the ear, and overdirect each section to the center of the back. Repeat on the left-hand side of the nape.

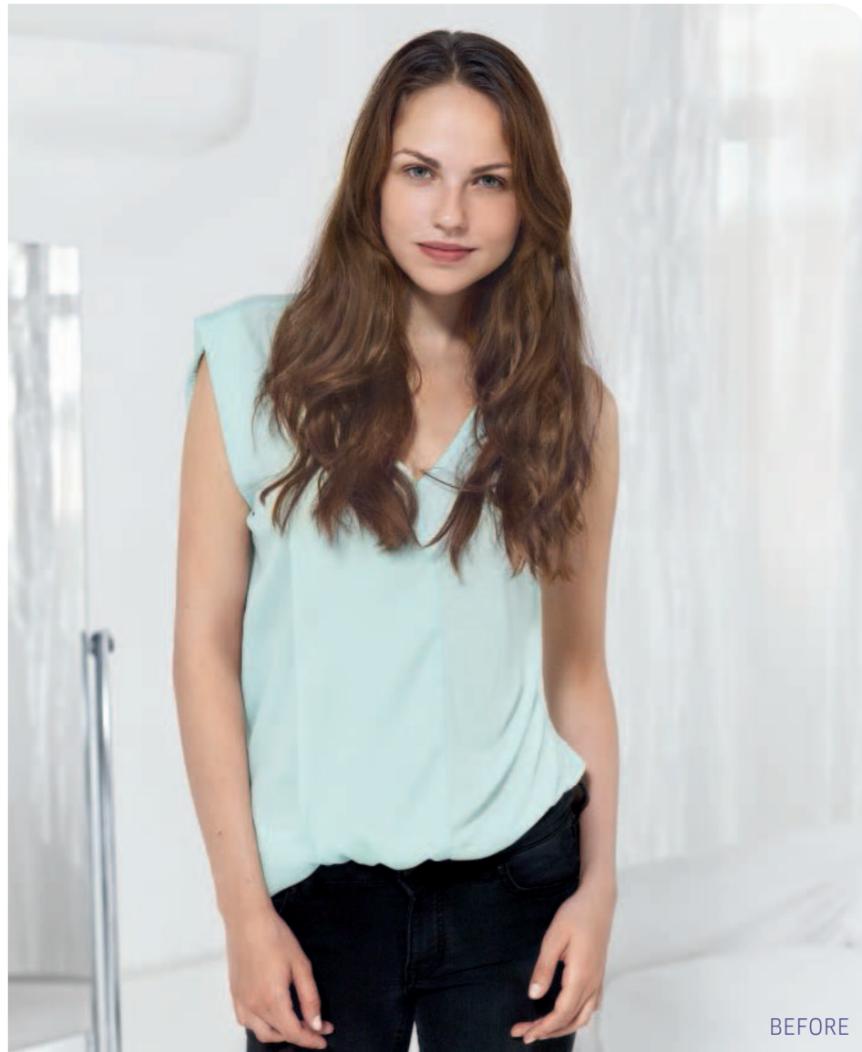

STEP 5
Drop down the section from the recession on one side and continue working in the same way as before, overdirecting each section to the center of the back. Repeat on the other side.

STEP 6
Take a 1-inch-wide vertical section from the top through to the center. Using the hair length at the center of the back pulled up as a guide, slide cut from the guideline to the front. Continue overdirecting 1-inch-wide vertical sections to the center until complete.

STEP 7
Finally, to create a soft diagonal fringe slide a razor from the inside corner of the eye to below the cheekbone.

COLOR A = Blondor 9%
COLOR B = 6/16 + 9%
COLOR C = 5/81 + 6%

STYLING HINTS AND TIPS

Using a large round brush, blow-dry smooth without creating too much lift at the root area. Barrel curl the hair at the mid-lengths and ends to create soft movement. Brush into shape with a vented brush and then gently shake the hair loose by running your fingers through the mid-lengths and ends to create texture.

ILLUMINA AURORA

COLOR

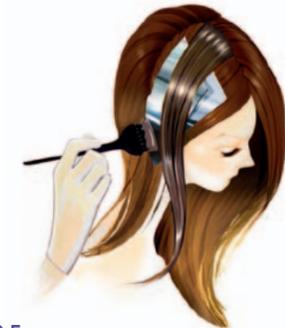

STEP 1
Create a teardrop section on the top and secure with a clip. Gently back brush the remaining hair.

STEP 4
Repeat the teardrop section on the top and isolate the pre-lightened areas on both sides in foil with color formula B, leaving a 1-inch drag at the root area.

STEP 2
Apply color formula A through the mid-lengths and ends using a back brushing technique with the color brush.

STEP 5
Section the hair from ear to ear to create 2 sections. Starting with front section on the top, apply color formula C with root stretch to mid-lengths, laying the hair over the foil from the previous step. Apply color formula B to the ends, continuing down to the ear until complete. Repeat on the other side.

STEP 3
On the outside edge of the teardrop shape, take 2 slices, side by side and back to back, and apply color formula A. Repeat on the other side. Develop until a pale orange undertone is achieved. Rise, shampoo lightly and blow-dry.

STEP 6
Starting at the nape, apply color formula C in the same way, with root stretch into the mid-lengths. Leave the ends free from color, and continue until the back section is complete.

STEP 7
Finally, apply color formula B to the non-colored ends until complete.

CUT

STEP 1
Divide the hair into 4 sections.

STEP 4
Blend the hair length from the chin to the baseline by side cutting gently.

STEP 2
Holding the hair between your fingers, cut the length below the armpit at a slight elevation to create a soft edge.

STEP 5
Next, elevate the hair at a 45-degree angle on the top. Overdirect the hair forwards to the face and continue working around the head in a star shape until complete.

STEP 3
Drop down the side sections and, using the back length as a guide, continue to follow around at a slight soft elevation, working into the side. Repeat on the other side.

STEP 6
Finally, use a razor to soften the edges around the face.
